

QUEEN ANNE DENTISTRY

DAVID M. ARNDT, DDS, PS

November 2022

Dear Friends and Valued Patients,

Infection control has always been a top priority for our practice and you may have seen this during your visits to our office. Our infection control processes are made so that when you receive care, it's both safe and comfortable. We want to tell you about the infection control procedures we follow in our practice to keep patients and staff safe.

Our office follows infection control recommendations made by the American Dental Association (ADA), the U.S. Centers for Disease Control and Prevention (CDC) and the Occupational Safety and Health Administration (OSHA). We follow the activities of these agencies so that we are up-to-date on any new rulings or guidance that may be issued. We do this to make sure that our infection control procedures are current and adhere to each agencies' recommendations.

You may see some changes when it is time for your next appointment. We have made these changes to help protect our patients and staff. For example:

- Masks are still required when you enter the office.
- We have hand sanitizer in the waiting room that we ask you to use when you enter the office. You will also find hand sanitizer in the reception area and in other locations in the office for you to use as needed.
- Each patient will be asked to fill out a Covid-19 screening form upon arrival.

We look forward to seeing you and are happy to answer any questions you may have about the steps we take to keep you, and every patient, safe in our practice. To make an appointment please call our office at (206) 284-3780.

Thank you for being our patient. We value your trust and loyalty and look forward to serving you, our patients, neighbors and friends.

Sincerely,

Dr. David Arndt and Team
